

BI Cloud Services Rapid Deployment

Key Features

Edgewater Ranzal's Rapid Deployment for BI Cloud Services provides you with the following benefits:

- + A predefined package and scope
- + Stand up a solution in just a few weeks and provide a foundation for future development
- + Quick value with the ability to extend the solution with additional requirements

Key Benefits

- + Fast access and low cost speed time-to-value
- + Quick start means users are productive immediately
- + A single business intelligence platform for the targeted departmental or functional unit
- + Timely access to data means greater impact
- + Streamlined operations and reduced burden on IT

A Prepacked Project that Provides an Oracle Business Intelligence Cloud Service (BICS) Environment

Do you need an enterprise business intelligence tool, but face resource constraints or lack a commitment from IT? With Edgewater Ranzal's prepackaged project, you can easily and quickly adopt a proven platform for powerful analysis and reporting in the Cloud despite limited business intelligence requirements such as a single department or functional unit. Scope, activities, and deliverables include:

- + Integration of one data source
- + One data model (star schema) supporting a single business process
- + Role-based provisioning for up to 25 users
- + Configuration of up to 40 key metrics
- + Configuration of up to 4 web and mobile device-ready dashboards for information delivery
- + Complete design documentation to understand the configuration of the application
- + Documented system administration guide to understand how to manage the environment
- + Pilot launch at the end of 6 weeks

Key Assumptions

- + Source system identified by client
- + Relevant database tables available from which to extract data
- + Pre-defined extraction SQL or process
- + System access, including read access to source databases through appropriate querying tool (i.e. SQL Developer)
- + Established BICS subscription

Oracle BI Cloud Services

Key Benefits

- + Predefined package and scope
- + Stand up a solution in just a few weeks and provide a foundation for future development
- + Quick value with the ability to extend the solution with additional requirements
- + Drive business agility by linking the organizational strategy to execution
- + Measure and present key metrics in one easy to use dashboard that can be accessed from anywhere
- + View your key performance metric vs. organizational goals and drive improvement opportunities
- + Highlight variances to established targets and ensure organizational accountability
- + Fast access and low cost speed time-to-value
- + Quick start means users are productive immediately
- + A single BI platform for all users helps consolidate analytic investments
- + Timely access to data means greater impact
- + Streamlined operations and reduced burden on IT

About Oracle Business Intelligence Cloud Service

Proven Platform for Powerful Analysis and Reporting in the Cloud

Based on proven Oracle BI technology relied upon by millions of users, BI Cloud Service makes agile analytics immediately available at any scale. Because BI Cloud Service is designed to be used by every employee, organizations can better leverage more of their workforce to drive more rapidly to new insights through:

- + **Robust Interactive Reporting** - Providing full ad hoc query and analysis capability, BI Cloud Service enables users to create new analyses from scratch or modify existing analyses in dashboard pages. Users are insulated from data structure complexity through the metadata layer, which offers a logical view of OLAP Groupings, selections, metrics, hierarchies, and calculations expressed in understandable concepts.
- + **Dynamic Dashboards** - The starting point for analysis and insight, BI Cloud Service empowers users to quickly and easily create interactive dashboards and reports with a rich variety of visualizations. Users can drill, pivot, and filter their data directly on a dashboard, while a comprehensive set of prompts and powerful right-click interactions offer even more advanced analysis capabilities. With so many visualizations available, the “Auto-Suggest” feature will recommend the best option for particular queries.

About Edgewater Ranzal
